

Functional Analyst

Core – Regulatory Risk Team

03/February/2017

About Wolters Kluwer Financial Services

Whether complying with regulatory requirements or managing financial transactions, addressing a single key risk, or working toward a holistic enterprise risk management strategy, Wolters Kluwer Financial Services works with customers worldwide to help them successfully navigate regulatory complexity, optimize risk and financial performance, and manage data to support critical decisions. Wolters Kluwer Financial Services provides risk management, compliance, finance and audit solutions that help financial organizations improve efficiency and effectiveness across their enterprise.

With more than 30 offices in 20 countries, the company's prominent brands include: AppOne®, AuthenticWeb™, Bankers Systems®, Capital Changes, CASH Suite™, GainsKeeper®, NILS®, OneSumX®, TeamMate®, Uniform Forms™, VMP® Mortgage Solutions and Wiz®. Wolters Kluwer Financial Services is part of Wolters Kluwer, which had 2014 annual revenues of €3.7 billion (\$4.9 billion), employs 19,000 employees worldwide, and maintains operations in over 170 countries across Europe, North America, Asia Pacific, and Latin America. Wolters Kluwer is headquartered in Alphen aan den Rijn, the Netherlands. Its shares are quoted on Euronext Amsterdam (WKL) and are included in the AEX and Euronext 100 indices.

Job description

We are currently hiring a highly motivated Functional Analyst to join our Regulatory Risk Team. We expect a solid knowledge of vanilla banking products and banking concepts in general through your academic background or through relevant work experience. Knowledge of more complex banking products, the Basel (II/III) prudential regulatory framework for financial institutions and its supervisory standards, is a clear bonus.

In this role, you will work on a wide variety of projects, analysing supervisory regulation and implementing these within our purpose built applications. You will be involved in the whole delivery chain: from functional conception of the software until its delivery to our worldwide customer base, including aftercare and implementation support. We deliver financial content through purpose built software so a strong affinity with or interest in information technology is a must.

Your responsibilities:

- Analysing business requirements for new features, take in customer requests and analyse publications from supervisory bodies
- Translating requirements into functional specifications, study the impact on the current application, implement your analysis into our applications, conduct functional acceptance testing and document your work
- Being a key member of a team of seasoned professionals consisting of both senior business analysts and senior developers who are there to train, to guide and to mentor you
- In time, taking a pro-active role in the continuous enhancement of our Regulatory Risk applications and to support internal stakeholders in their implementation and sale of our software.

Qualifications, Skills, Behaviours & Attitudes

- A solid academic background in economics, banking or finance, or strong affinity with those topics through prior relevant work experience.
- Solid knowledge of banking products and banking concepts
- Relevant knowledge in the finance industry
- Good knowledge of Microsoft tools (Excel)
- Fluent in English, written and oral, is a must. All other languages (French, Dutch ,...) are an asset

Desirable

- Knowledge of more complex banking products, the Basel (II/III) prudential regulatory framework for financial institutions and its supervisory standards
- Affinity with IT
- Experience with relational databases and/or SQL
- First experience with agile/SCRUM development techniques

Personality / Personal traits

- Motivated and eager to learn
- Analytical with an eye for accuracy and quality
- Strong TEAM player but independent thinker
- Hands-on, problem solving state of mind
- Relishes a challenge, results driven, willing to go the extra mile

How to apply:
